

A.A.

TABLE I. DATA WITH RESPECT TO THE EFFECT OF THE PROCESSING TAX ON COTTON USED AS A FILLING MATERIAL FOR MATTRESSES, PILLOWS, PADS, AND CUSHIONS.

The term "cotton" as used at the hearing of June 17, 1935 refers to any and all grades and characters of cotton subject to the processing tax beginning August 1, 1933, and includes waste cottons which occur during the ginning, compressing and marketing, known in the trade as damaged pickings, gin falls, motes, compress and warehouse sweepings, grabbots, etc., as well as staple cotton.

In addition to the verbal testimony that will be given at the hearing it will be helpful in determining factual matters considered at this hearing if data are presented so far as practicable, separately for each-mattresses, pillows, pads, and cushions, substantially as indicated in the following:

MATTRESS DATA

2

1/ 9 months, August 1, 1934 to April 30, 1935.

Year Beginning August 1	Total Consumption of Filling Materials Used For All Types of Mattresses			Average Cost per pound, Landed at Factory, of Each Filling Material Used		
	Linters (Pounds)	Staple Cotton (Pounds)	Other Material (Pounds)	Filling Material (Pounds)	Total Linters (Pounds)	Staple Cotton (Pounds)
1931-32						
1932-33						
1933-34						
1934-35						
1935-36						

C If you shifted from the use of "staple cotton" to some other fiber as a filling material for mattresses since August 1, 1931, indicate the date of shift, _____ reason for shift, _____ and the material to which the shift was made. _____
